SIEMENS

TX-I/O™

Super universal modules **TXM1.8X** TXM1.8X-ML

- Two fully compatible versions:
 - TXM1.8X:
 - 8 inputs/outputs with LED signal / fault indication TXM1.8X-ML: As TXM1.8X, but with additional local override facility with LCD display (LO/ID to ISO 16 484-2)
- 8 universal I/O points, individually configurable as
 - Digital input: maintained contact, pulse or counter
 - Analog input: sensor, 0..10V, 4..20mA
 - Analog output: 0..10V, 4..20mA (I/O points 5 ... 8)
- Compact DIN format, small footprint
- Separate terminal base and plug-in I/O module for convenient handling - Self-establishing bus connection for maximum ease of installation
 - Terminal isolation function for fast commissioning
 - I/O module replaceable in seconds, without rewiring and without affecting the full functioning of the remaining I/O modules
- All terminals are directly on the I/O modules, allowing direct connection of • field devices without additional terminal strips.
- Simple strategy for operation and display
 - I/O status LED for each I/O point; mode of operation (N/C or N/O) and brightness depend on I/O function
 - LEDs and LCD for fast diagnostics
- Double-sided labels for identification of all I/O points

Function	Signal type (TRA)	Signal type	Description						
Status signal	BINO	D20	Volt-free, interrogation (maintained contact), N/O contact						
	BINC	D20R	Volt-free, interrogation (maintained contact), N/C contact						
Status pulses	BI Pulse NO	D20S	Volt-free, interrogation (pulse), N/O, N/C contact						
	BI Pulse NC								
Counter			Volt-free, N/O contact, interrogation (pulse)						
pulses	CI EI (100Hz)	С	Counting frequency max. 100 Hz (electronic counter)						
M = 14 =	CI Mech (10/25Hz)	1140	max. 25 Hz (mech. counter)						
Voltage, current,	AI 0-10V	U10	DC voltage 0 10 V						
resistance and	AI 4-20mA	1420	DC current 4 20 mA						
temperature	AI 0-20mA	125	DC current 0 20 mA						
			Please note that the max. current is 20 mA!						
	AI 2500 Ohm	R2K5	Resistance 2500 Ω						
	AI Ni1000 extended	Ni1K	Temperature sensor LG-Ni 1000 ohms, up to 180 °C						
	AI Ni1000	R1K	Temperature sensor LG-Ni 1000 ohms						
	AI PT1K375	Pt1K 375	Temperature sensor Pt 1000 (USA)						
	AI PT1K385	Pt1K 385	Temperature sensor Pt 1000 (Europe)						
	AI Pt1000	P1K	Resistance Pt 1000 ohms and resistance transmitter						
	AI T1 (PTC)	T1	Temperature sensor PTC						
	AI NTC10K	NTC10 K	Temperature sensor NTC 10 K						
	AI NTC100K	NTC100 K	Temperature sensor NTC 100 K						
Proportional output signals	AO 0-10V	Y10S	Proportional control output, DC 0 10 V, with storage of control value						
	AO 4-20mA	Y420	Proportional control output, current DC 4 20 mA (I/O points 5 8 only)						

The modules support the following I/O functions:

For a detailed description of these functions, please refer to document CA110561, "TX-I/O™ functions and operation".

Compatibility

Support of signal types and functions in different building automation and control systems: see TX-I/O Engineering and installation manual, CM110562

Type summary

ASN	Super universal module TXM1.8X Super universal module TXM1.8X-ML with LCD display and local override
Delivery	The terminal base and the electronic plug-in unit are interconnected and delivered in the same box.
Accessories	The available accessories include address keys, label sheets, and spare transparent label holders. Refer to data sheet CM2N8170.
2/10	

For a description of the features common to all TX-I/O[™] modules, please refer to the TX-I/O[™] Engineering and installation manual, document CM110562.

Indicators and operator controls

Connection terminals (No. 1 screwdriver for slotted or recessedhead * screws) with test pickup (for 1.8...2 mm pins) and terminal number Signal designation

Override status LEDs (yellow)

Address key and module status LED

LCD panel (TXM1.8X-ML only)

I/O point numbers

Override button (TXM18X-ML only)

I/O status LEDs (green)

* Combined slotted / recessed-head screws from mid-2012

I/O status LEDs	 The I/O status LEDs (green) indicate the status of the inputs and outputs (peripheral devices)
	They are also used for diagnostics
Module status LED	 The module status LED illuminates the transparent address key
	 The LED (green) shows the module status as a whole (as opposed to the status of the I/O points)
	 It is also used for diagnostics
Address key	 The module operates only with the address key inserted
	 The module address is mechanically encoded in the address key
	 When replacing the I/O module, the address key must be swiveled outward. It
	remains plugged into in the terminal base.

Local override and LCD display (TXM1.8X-ML only)

	For a detailed description, please refer to document CM110561, "TX-I/O™ Functions and operation".
Override button	 Pressing an button in the middle enables or disables the local override Pressing "+" or "-" respectively increases or reduces the output value. Only outputs can be overwritten. Any attempt to overwrite an input results in an error indication.

Override status LED

LCD display

arning

- The yellow "Override" LED indicates that local override is active
- The following information is displayed for each I/O point:
 - Configured signal type
 - Symbolic display of process value
 - Information for diagnostics.
- All safety-relevant functions must be implemented with external solutions
- The local override must not be used for safety shutdown operations
- In compliance with the standard (ISO 16 484-2, Section 3.110), the module executes all local overrides directly, without safety precautions or interlocks.
 → Full responsibility lies with the operator.

Module labeling

The plug-in I/O module has a removable transparent cover (the label holder) for insertion of a label.

Disposal

The devices are considered electronics devices for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic garbage.

- Dispose of the devices through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Engineering, mounting, installation

Please refer to the following documents

Document	Number
TX-I/O [™] functions and operation	CM110561
TX-I/O [™] Engineering and installation manual	CM110562
Replacement of legacy modules	CM110563

Permitted orientation	The TX-I/O™ devices can be installed in any orientation:					
	It is important to provide adequate ventilation so that the admissible ambient temperature (max. 50°C) is not exceeded.					
Technical data						
Supply (bus connector on side)	Operating voltage range	DC 21.5 26 V (SELV / PELV) or DC 24 V class 2 (US)				
(,	Max. power consumption TXM1.8X TXM1.8X-ML	2.2 W 2.3 W				
	(for the sizing of power supplies, see CM110562)					
Protection	All terminals of the modules	Against shortcut and incorrect wiring with AC / DC 24 V				
	Bus connector on side	No protection!

Digital inputs

- U Super universal module
- K1 Status contact (N/O)
- K2 Status contact (N/C)
- K3 Pulse contact (N/O)
- K4 Pulse contact (N/C)
- S5 Electronic switch

Terminal layout

		TXM1.8X, TXM1.8X-ML						
I/O point	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
System neutral \perp (–) ¹⁾	2	6	10	14	19	23	27	31
Input 🕈 (+)	4	8	12	16	21	25	29	33

STOP) Counter inputs

Counter inputs faster than 1 Hz that are routed for more than 10 m in the same trunking as analog inputs must be shielded.

Analog inputs

U)
(1) ⊥ ‡ 2 4 3	(2) ⊥	(3) ⊥ ↓ 10 <u>1</u> 2 11	(4) ⊥ ‡ 14 16
□ DC 24 V	→ [×] †	DC 24 V	
B4	B5	B6	B7

- U Super universal module
- B1 LG-Ni 1000 temperature sensor
- B2 General temperature sensor
- R3 Resistance transmitter r
- B4 Active sensor with DC 24 V supply
- B5 Active sensor with AC / DC supply
- B6 Active sensor 0 ... 20 mA or 4 ... 20 mA (2-wire)
- B7 Active sensor with external supply External supply must NOT be earthed (earth loop)

Terminal layout

	TXM1.8X, TXM1.8X-ML							
I/O point	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Measuring neutral \perp (–) ¹⁾	2	6	10	14	19	23	27	31
Input 🗘 (+)	4	8	12	16	21	25	29	33
AC/DC sensor supply voltage ²⁾	Selected from: 7, 15, 24, 32							
DC +24 V sensor supply voltage 3)	Selected from: 3, 11, 20, 28							

Analog outputs

- Super universal module Actuator with input
- DC 0 ...10 V or 4 ... 20 mA
- Y2 ... Y4 General device with input DC 0 ..10 V or 4 ... 20 mA, Supply AC / DC, DC 24 V or externally *External supply must NOT be earthed (earth loop)*

Terminal layout tension

	TXM1.8X, TXM1.8X-ML							
I/O point	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
System neutral \perp (–) ¹⁾	2	6	10	14	19	23	27	31
Output 🕈 (+)	4	8	12	16	21	25	29	33
AC/DC operating voltage ²⁾	Selected from: 7, 15, 24, 32 ²⁾							
DC +24 V operating voltage ³⁾ Selected from: 3, 11, 20, 28				28 ³⁾				

Terminal layout current

	TXM1.8X, TXM1.8X-ML							
I/O point	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
System neutral \perp (–) ¹⁾					19	23	27	31
Output 🕈 (+)	-		1	1	21	25	29	33
AC/DC operating voltage ²⁾	Selected from: 7, 15, 24, 32 ²⁾							
DC +24 V operating voltage ³⁾	Selected from: 3, 11, 20, 28 ³⁾							

- ¹⁾ All measuring / system neutral terminals are interconnected, not in the terminal base but in the plug-in I/O module. When this unit is pulled outward (into the "parking" position) there is no connection.
 - The system neutral of a digital input can be connected to any system neutral terminal
 - With analog inputs and outputs, the measuring / system neutral must always be connected to the terminal associated with that I/O point.
- ²⁾ All AC/DC 24V supply terminals are interconnected (in the I/O module, not in the terminal base). They are protected in the power supply module / bus connection module (T10A). Wiring of the AC 24/DC V supply (terminals 7, 15, 24, 32): Use cable cross section suited for 10 A according to local regulations.
- ³⁾ All DC 24 V supply terminals are interconnected. They are protected in the module against shortcut and incorrect wiring.

For wiring details refer to the TX-I/O[™] Engineering and installation manual, CM110562.
